

LARSON Storm Door with Retractable Screen

The storm/screen door is manufactured by Larson. Maintenance of the door is the responsibility of the homeowner. Replacement parts can be purchased directly from Larson on their website at:

http://www.larsondoors.com/customer_support/assistance_contact_support/

Or by phone at (800) 352-3360

One thing you need is the Model Registration Number that can be found on a paper sticker that is on the hinge area of the door. Open the door completely and the sticker with the number is affixed to the part of hinge that is screwed into the woodwork of the door frame. That number identifies your particular door. Either use the online form or call them directly to identify the part number of the part that needs replacement.

The most common replacement item is the "Retractable Screen" which can be purchased for around \$36 and comes with an installation guide.
